Many people do not think of sunscreen as having an expiration date. Shelf life varies from two to three years, depending on the product you choose. Look at that date prior to making your purchase and continue to pay attention to it. Keep track of where your product has been as exposure to UV light and heat can degrade a product a lot faster. Excessive humidity can also affect the effectiveness of sunscreen..

An Onsite Defibrillator (AED) for use on someone with Sudden Cardiac Arrest continues to be available if needed/ It is located in the elevator alcove on the wall in the narthex. There is signage visible in the hall. Please take note of the location.
